ABOUT ME

I am Mohamed, 25 years old, born in Alexandria. I graduated from the Faculty of Education, Department of Physics. I love teaching and started in this field during my third year of college, receiving practical training at a middle school and later a secondary school.

After graduation, I joined Gamal Abdel Nasser Military Secondary School for Boys in Alexandria as a teacher of integrated sciences and physics, where I am currently responsible for nine classes across two grade levels.

During college, I served as class representative for four years, coordinating with professors and teaching assistants, preparing summaries of scientific research, and organizing annual charitable initiatives with my colleagues.

EDUCATION

Bachelor of Science and Education, Department of Physics

2019 – 2023

Grade: Good
